A#3: Demo-based evaluation

Date & Time	July 30 11:50			
Evaluator	A		M	
Student netlink	milesbaray			

Repository log:

Ok. commits not very descriptive..

LLM.md content and explanation:

help translating Haskell approach into Rust,
and some Rust syntax and debugging.

Stamps:

- Test cases

passes all tests except 24 (hangs).

- Explanation of code strategy.

Good explanation.

Playground:

- Evaluation of $(4 + 6 * (2 ^ 3)) - 5 / (1 + 1)$

Good code/pass style explanation

- What is needed to change to $(4 + (6 * 2) ^ 3) - 5 / (1 + 1)$

Correct.

- Explanation of code strategy in `expr_eval`:

Good explanation.

RECOMMENDED GRADE:

___ D C C+ B- B B+ A- A A+

Question #4: correct.
